

**SAMPLE FORM – NOT VALID FOR SUBMISSION TO BUILDING DEPARTMENTS****CERTIFICATE OF INSTALLATION**

*This Certificate of Installation documents the installation of service water heating features, materials, components, and manufactured devices required to demonstrate compliance with Title 24, Part 6 per §10-103(a)3 for nonresidential, hotel/motel and high-rise residential occupancies.*

**SAMPLE FORM – NOT VALID FOR SUBMISSION TO BUILDING DEPARTMENTS****C. COMPLIANCE RESULTS**

*This table indicates whether the as-built conditions documented in this form are equal or better than what was documented on the permitted Certificate of Compliance. If the installation is not equal or better, Section 10-103(a)2B requires the Certificate of Compliance form to be revised accordingly to demonstrate compliance.*

|                                                                                                                                                 |                                                                                |
|-------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|

**SAMPLE FORM – NOT VALID FOR SUBMISSION TO BUILDING DEPARTMENTS****Condensers Serving Commercial Refrigeration System**

- The following requirements have been included on the permitted Certificate of Compliance (NRCC) to comply with Title 24, Part 6. Installed equipment shall meet these requirements or the Certificate of Compliance shall be modified to demonstrate compliance.*
- The project includes replacement condensers that meet the following conditions:*
  - attached compressor system Total Heat of Rejection does not increase and;*
  - less than 25 percent of both the attached compressors and the attached display cases are new.*
- All equipment, appliances and components serving the refrigeration system have been certified by the Energy Commission as compliant with Title 20 and listed in the Modernized Appliance Efficiency Database System found at <https://cacertappliances.energy.ca.gov/Pages/Search/AdvancedSearch.aspx.1>*

*CO Sensors shall be:*

- A. Certified by the manufacturer to be accurate within plus or minus 5% of measurement.*
- B. Factory calibrated*
- C. Certified by the manufacturer to drift no more than 5% per year.*
- D. Certified by the manufacturer to require calibration no more frequently than once a year.*
- E. Monitored by a control system. The system shall have logic that automatically checks for sensor failure by the following means. Upon detection of a failure, the system shall reset to design ventilation rates and transmit an alarm to the facility operators.*
  - i. If any sensor has not been calibrated according to the manufacturer's recommendations within the specified calibration period, the sensor has failed.*
  - ii. During unoccupied periods the system compares the readings of all sensors, e.g., if any sensor is more than ppm above or below the average of all sensors for longer than 4 hrs, the sensor has failed.*
  - iii. During unoccupied periods the system compares the readings of sensor in the same proximity zone, e.g. if the 30 minute rolling average for any sensor in a proximity zone is more than 15 ppm above or below the 30 minute rolling average for other sensor(s) in that proximity zone, the sensor has failed.*

| Per NRCC    | Includes a dedicated branch circuit wiring and outlet accessible to cookline appliances and meets the following requirements:<br><br>a) The branch circuit conductors shall be rated at 50 amps minimum.<br>b) The electrical service panel shall have a minimum capacity of 800 connected amps. | The electrical service panel shall be sized to accommodate an additional either 208v or 240v 50-amp breaker. |
| As-built    |                                                                                                                                                                                                                                                                                                  |                                                                                                              |

**G. ACCEPTANCE TESTS & FIELD VERIFICATION**

**SAMPLE FORM – NOT VALID FOR SUBMISSION TO BUILDING DEPARTMENTS**

The following Acceptance Tests related to the systems or materials documented on this Certificate of Installation have been indicated on the permitted Certificate of Compliance as being required to comply with Title 24, Part 6. Process System Acceptance Tests are not required to be completed by a certified Acceptance Test Technician and may be completed by a field technician (which may be the installer). The Certificate of Acceptance forms indicated below will be required by the Authority Having Jurisdiction to demonstrate compliance.

| Form/Title                                                                                                                                                             | Systems to be Field Verified |

**RESPONSIBLE PERSON'S DECLARATION STATEMENT**

I certify the following under penalty of perjury, under the laws of the State of California:

1. The information provided on this Certificate of Installation is true and correct.
2. I am eligible under Division 3 of the Business and Professions Code in the applicable classification to accept responsibility for the system design, construction, or installation of features, materials, components, or manufactured devices for the scope of work identified on this Certificate of Installation and attest to the declarations in this statement (responsible builder/installer), otherwise I am an authorized representative of the responsible builder/installer.
3. The constructed or installed features, materials, components or manufactured devices (the installation) identified on this Certificate of Installation conforms to all applicable codes and regulations and the installation conforms to the requirements given on the Certificate of Compliance, plans, and specifications approved by the enforcement agency.
4. I reviewed a copy of the Certificate of Compliance approved by the enforcement agency that identifies the specific requirements for the scope of construction or installation identified on this Certificate of Installation, and I have ensured that the requirements that apply to the construction or installation have been met.
5. I understand that a completed signed copy of this Certificate of Installation shall be made available with the building permit(s) issued for the building and shall be made available to the enforcement agency for all applicable inspections. I will take the necessary steps to fulfill this requirement.
6. I understand that a completed signed copy of this Certificate of Installation is required to be included with the documentation the builder provides to the building owner at occupancy. I will take the necessary steps to fulfill this requirement.

#### A. General Information

1. This field is filled out automatically.
2. Enter the Zip Code.
3. Enter the Date of Permit Set used for construction.
4. Enter the Name of Permit Set used for construction.
5. Enter the Authority Having Jurisdiction.
6. Enter the Building Permit #.
7. Enter the Date of As-Built Set.
8. Enter the Name of As-Built Set.

#### B. Project Scope

1. Select applicable electrical components.
2. Select applicable HVAC components.
3. Select applicable insulation.
4. Select applicable plumbing components.
5. Select applicable refrigeration scope.
6. Select applicable specialties.

#### C. Compliance Results

1. This table is automatically filled with uneditable comments based on data entered in Section F.

#### D. Exceptional Conditions

1. This table is automatically filled with uneditable comments because of selections made or data entered in tables throughout the form.

#### E. Additional Remarks

1. Enter any notes or comments for the AHJ.

#### F. INSTALLATION DETAILS

##### Refrigerated Warehouse/Space Fan Powered Evaporators

1. This field is filled out automatically.
2. Enter the Model #.
3. Motor HP: Select from dropdown.
4. Phase: Select from dropdown.

|                                               |               |

| Process System                                | (Page 2 of 8) |

5. Type or Efficiency: Select from dropdown.
6. Fan Controls: Select from dropdown.
7. This field is filled out automatically.

**Refrigerated Warehouse/Space Condensers (Air-cooled, Water-cooled, Evaporative-cooled, Adiabatic)**

1. This field is filled out automatically.
2. Enter the Model #.
3. Condenser Location: Select from dropdown.
4. Temp Setpoint Controls: Select from dropdown.
5. Variable Speed Control: Select from dropdown.
6. Refrigerant Type: Select from dropdown.
7. Enter the Efficiency (Btuh/W).
8. This field is filled out automatically.

**Refrigerated Warehouse/Space Compressors**

1. This field is filled out automatically.
2. Enter the Model #.
3. Condenser Temp: Select from dropdown.
4. Variable Speed Control: Select from dropdown.
5. Variable Volume Ratio: Select from dropdown.
6. This field is filled out automatically

**Refrigerated Warehouse/Space Infiltration Barriers and Automatic Door Closers**

1. This field is filled out automatically.
2. Infiltration Barrier: Select from dropdown.
3. Door Closure: Select from dropdown.
4. This field is filled out automatically

**Transcritical CO2 Fan-powered Gas Coolers**

1. This field is filled out automatically.
2. Static text describing variable speed fan control requirement
3. Static text describing gas cooler pressure control requirements
4. Design Condensing Temperatures: Select from dropdown.
5. Enter the Efficiency (Btuh/W).

6. This field is filled out automatically.

#### **Mandatory Pipe Insulation All Occupancies**

1. This field is filled out automatically.
2. Static text describing Pipe Insulation Applications
3. Static text describing Pipe Insulation Protection

#### **Refrigerated Warehouse/Space Exterior Surface Insulation**

1. Select if exterior surfaces of refrigerated warehouses/spaces are insulated at least to the minimum R-values.
2. Nothing to do for this column.
3. Nothing to do for this column.
4. Nothing to do for this column.
5. This field is filled out automatically.

#### **Refrigerated Warehouse/Space Underslab Heating**

1. This field is filled out automatically.
2. Compliance Method: Select from the dropdown.
3. This field is filled out automatically.

#### **Condensers Serving Commercial Refrigeration System**

1. This field is filled out automatically.
2. Condenser Type: Select from dropdown.
3. Variable Speed Control: Select from dropdown.
4. Temp Setpoint Controls: Select from dropdown.
5. Enter the Specific Efficiency (Btuh/W).
6. Fin Density: Select from dropdown.
7. This field is filled out automatically.

#### **Compressors and Condensing Units Serving Commercial Refrigeration System**

1. This field is filled out automatically.
2. Saturation suction temperature control (SST): Select from dropdown.
3. This field is filled out automatically.

|                                               |               |

| CERTIFICATE OF COMPLIANCE – USER INSTRUCTIONS | NRCI-PRC-E    |
| Process System                                | (Page 4 of 8) |

### **Refrigerated Display Cases**

1. Select applicable lighting controls for refrigerated display cases & illuminated glass doors of walk-in coolers/ freezers.
2. This field is filled out automatically.

### **Heat Recovery of Refrigeration System:**

1. Select from dropdown.

### **Transcritical CO<sub>2</sub> Fan-powered Gas Coolers**

4. This field is filled out automatically.
5. Static text describing variable speed fan control requirement
6. Static text describing gas cooler pressure control requirements
7. Design Condensing Temperatures: Select from dropdown.
8. Enter the Efficiency (Btuh/W).
9. This field is filled out automatically.

### **Mandatory Pipe Insulation All Occupancies**

1. This field is filled out automatically.
2. Static text describing Pipe Insulation Applications
3. Static text describing Pipe Insulation Protection

### **Enclosed Parking Garage Exhaust Controls**

1. Select the As-built box if the Exception applies.
2. Select the As-built box if the Exception applies.
3. Select the As-built box if the Requirement is met.
4. Select the As-built box if the Requirement is met.
5. Select the As-built box if the Requirement is met.
6. Select the As-built box if the Requirement is met.
7. Select the As-built box if the Requirement is met.
8. Select the As-built box if the Requirement is met.
9. Select the As-built box if the Requirement is met.

|                                               |               |

| CERTIFICATE OF COMPLIANCE – USER INSTRUCTIONS | NRCI-PRC-E    |
| Process System                                | (Page 5 of 8) |

### Enclosed Parking Garage Exhaust

1. This field is filled out automatically.
2. Enter the Parking Garage Area (ft<sup>2</sup>).
3. Enter the Ventilation Fan Rate (CFM).
4. This field is filled out automatically.

### Process Boilers

1. This field is filled out automatically.
2. Enter the Model #.
3. Rated Input Capacity per Boiler (Btu/h): Select from dropdown.
4. Fan Controls: Select from dropdown.
5. Combustion Air Shutoff: Select from dropdown.
6. Stack Design and Controls: Select from dropdown.
7. This field is filled out automatically.

### Compressed Air Systems

1. This field is filled out automatically.
2. Enter the Model #.
3. Trim Compressor: Select from dropdown.
4. Controls: Select from dropdown.
5. Monitoring: Select from dropdown.
6. Service Line Size: Select from dropdown.
7. This field is filled out automatically.

### Elevator Lighting and Ventilation

1. This field is filled out automatically.
2. This field is filled out automatically.
3. Enter the Lighting Number of Fixtures.
4. Enter the Lighting Watts per Fixture.
5. This field is filled out automatically.
6. This field is filled out automatically.
7. This field is filled out automatically.
8. Enter the Ventilation Fan Power (Watts).
9. Enter the Ventilation Airflow (CFM).

|                                               |               |

| Process System                                | (Page 6 of 8) |

10. This field is filled out automatically.
11. Controls: Select from dropdown.
12. This field is filled out automatically.

### **Escalators and Moving Walkway Speed Controls**

1. This table covers requirements for Escalators and moving walkways located in airports, hotels, and transportation function areas.

### **Computer Room Systems**

1. This field is filled out automatically.
2. Economizer: Select from dropdown.
3. Reheat Controls: Select from dropdown.
4. Humidification: Select from dropdown.
5. Enter the Sensible Cooling Capacity (kBtuh).
6. Enter the Total Fan System Power (Watts).
7. Fan Controls: Select from dropdown.
8. Containment: Select from dropdown.
9. This field is filled out automatically.

### **Computer Room Uninterruptible Power Supply (UPS)**

1. This field is filled out automatically.
2. Alternating Current Output UPS Compliance Method: Select from dropdown.
3. Type of UPS: Select from dropdown.
4. Enter the UPS Rated Output Power.
5. Enter the Efficiency.
6. This field is filled out automatically.

### **Commercial Kitchen Ventilation**

1. This table covers commercial kitchen ventilation requirements.

### **Commercial Kitchen Hood**

1. This field is filled out automatically.
2. Hood Type: Select the dropdown.
3. Hood Style: Select the dropdown.

|                                               |               |
|-----------------------------------------------|---------------|
| CERTIFICATE OF COMPLIANCE – USER INSTRUCTIONS | NRCI-PRC-E    |
| Process System                                | (Page 7 of 8) |

4. Equipment Duty: Select the dropdown.
5. Enter the Hood Length (ft).
6. Enter the Hood Exhaust Rate (CFM).
7. This field is filled out automatically.

#### **Laboratory and Factory Exhaust and Fume Hoods**

1. Enter the Zone/System or Item Tag.
2. Airflow Reduction: Select from dropdown.
3. Transfer Air: Select from dropdown.
4. Fan power: Select from dropdown.
5. Hood Sash Closure: Select from dropdown.

#### **Fans**

#### **Exhaust Systems §140.9(c)3D**

#### **Controlled Environment Horticulture Lighting**

1. This field is filled out automatically.
2. Photosynthetic Photon Efficacy (PPE): Select from dropdown.
3. Timeswitch Lighting Controls: Select from dropdown.
4. Multilevel Lighting Controls: Select from dropdown.
5. Static text describing electrical system monitoring requirement.
6. This field is filled out automatically.

#### **Space Conditioning for Plant Production**

1. Enter name or description of system.
2. Dehumidification System for Indoor Grow CEH Compliance Method: Select from dropdown.
3. This field is filled out automatically.
4. This field is filled out automatically.

|                                               |               |

| Process System                                | (Page 8 of 8) |

### **Greenhouse Envelope**

#### **Steam Traps in Industrial Facilities**

1. Update Interval Fault Detection Diagnostics Monitoring: Select from dropdown.
2. Alarm Display Fault Detection Diagnostics Monitoring: Select from dropdown.
3. Strainer Installation: Select from dropdown.
4. This field is filled out automatically.

#### **Electric Ready Commercial Kitchens**

#### **Documentation Declaration Statements**

1. The person who prepared the NRCI will sign and complete the fields for their name, company (if applicable), address, phone number, certification information (if applicable), date and signature.
2. The person who is assuming responsibility for the project being built to comply with Title 24, Part 6, will complete the fields for their name, company (if applicable), address, phone number, license number (if applicable), date and signature.
