

Information on Draft Compliance Documents

Please note that these are all *draft* documents and have not been approved by the California Energy Commission. The documents are *not* to be used for compliance but are intended for reference to indicate what the final approved documents are likely to look like. Additionally, we are continuing to make adjustments to these docs for ADA accessibility so the table layouts will change as that work is completed.

Additional notes on compliance documents:

- The CF1R compliance docs have updated headers and footers, as well as an updated general table at the top of the form – this is the new standard layout that is being applied to all of the residential compliance documents (CF1R, CF2R, CF3R, LMCI and LMCV). This is the table at the top of each form:

Project Name:	Enforcement Agency:
Dwelling Address:	Permit Number:
City and Zip Code:	Date Permit Issued:
