CF2R-MCH-02-E User Instructions**Section A. Whole House Fan (WHF) Equipment Information**

1. Enter the name of the manufacturer of the whole house fan.
2. Enter the model number of the whole house fan
3. Enter the rated airflow in CFM of the whole house fan. Based on CFM listed in HVI Directory.
4. Enter the quantity of this exact make and model of whole house fan installed in the home. Different make/model fans will be entered on a separate row.
5. This value is calculated automatically. It is the number of this type of fan multiplied by the rated air flow of this type of fan.
6. Select from attic or outside.

Section B. Whole House Fan Compliance Calculations

1. This field is automatically calculated. It is the sum of the rated air flows of all the installed whole house fans.
2. This field is automatically calculated. It is the sum of the rated air flows of all the installed whole house fans vented to the attic.
3. This field is automatically calculated. It is the sum of the rated air flows of all the installed whole house fans vented to the outside.
4. This field is automatically imported from the CF1R. The number used in the field equals the Conditioned Floor Area (CFA), in square feet, from the CF1R.
5. This field is automatically calculated. It is the Dwelling Conditioned floor area multiplied by 1.5 cfm/ft².

Section C. Attic Vent Free Area

1. This field is automatically calculated. It is the total installed whole house fan air flow vented to the attic divided by 750.
2. Enter the installed attic vent free area.

Section D. Compliance Statement

To comply, the total installed whole house fan airflow must be greater than or equal to the minimum whole house fan air flow AND the installed attic net free vent area must be greater than, or equal to, the required attic net free vent area.

Section E. Additional Requirements

1. To qualify, the installed whole house fan must be listed in the Home Ventilating Institute (HVI) Certified Products Directory, <https://www.hvi.org/hvi-certified-products-directory/>.
2. The homeowner shall be provided with user instructions documentation that describes the proper use of the whole house fan necessary to obtain the full energy savings benefit.
3. This must be a true statement to comply.
